

CRAFT

Development of Innovative Targeted Therapies through the
Modulation of Apoptosis

- Partner 1 : THERAPTOSIS France
Specialized in the development of molecules acting
on mitochondria (organelle orchestrating the
apoptosis response)
- Partner 2 : GENEPEP France
Specialized in “in silico” selection of peptides and
peptide synthesis
- Partner 3 : XXX European except France
Specialized in Tissue specific Drug Delivery
Technology

Rational Design of Mitochondrio Active Targeted Drugs

Natural New Peptides
Identification in silico Platform

New Peptides
Peptide synthesis Platform

Screening Platform
Biological Screening

Drug Delivery

Nouveaux lead (candidats médicament)
Developpement

Hits Optimization
In silico Design / synthesis
