FOOD INDUS TRACE

Topic 5.4.4.2

Emerging technologies for traceability

Thematic priority: TP5 Food Quality and Safety

Project title : Emerging technology for food industry traceability

Status : Under preparation

Call : FP6-2005-FOOD-4

Instrument: IP

Research area : T5.4.4 Traceability processes along the production chain

Topic : T 5.4.4.2 Emerging technology for food/feed traceability including monitoring the manufacturing and handling practices in the total chain

FOOD INDUS TRACE

Topic 5.4.4.2

Emerging technologies for traceability

Consortium : 4 Core members ACTIA (+ ACTA & ACTIA informatique),
Fraunhofer IPA, Danish Technological Institute and FIBL

Already 25 expressions of interest including 7 SMEs

Project description & strategy: **upscaling** of research results

3 technological sub projects:

- 1) Product identification technology
- 2) Genetic analysis technology (genetic constitution AND contamination)
- 3) Software technology for traceability system integration

2 major horizontal sub-projects:

- 1) Technology watch & cost benefit analysis
- 2) Scaling up & demonstration

Partners sought : industrial partners (SMEs) for

a) Technology transfer in the 3 technological areas

b) Demonstration along food supply chain (organic product, wine/meat?)
