

We are a company of approximately 100 people specialized in the field of the chemistry and Life sciences, and established in France, Germany and Spain. We developed a real know-how in the strategic support, decision aids and the setting up and management of projects.

With more than 12 years of presence in the sector of health, we developed a very good knowledge of the main actors of the field (SME as well as pharmaceutical and medical device companies, national and European institutional, public research centers, medical community), in France as well as the European level.

More specifically, we would like to answer the call for proposal « FP6-2005-SSP-5B- INFLUENZA » as a partner in the projects in the field of the avian influenza, lines 8.1 B.1.4 or 8.1 B.2.2. (for example, the project relating to the improvement of the diagnosis or the installation of alarm systems).

We will bring our competences in the following tasks:

- Strategic Audit
- Search for partners
- **Setting up of Research projects and networks** and drafting of the proposal
- Assistance to the management of the project on behalf of the coordinator and of the partners.

If you or other companies you know are likely to develop such projects or for further information, thank you to contact me by email or by phone at 01 44 30 10 90 or 06 23 74 38 49.

Best Regards

Salvatore CARPITA
