

DIGIMOBILE

Digimobile is a network company (SME) and we are dedicated in providing responsible and intelligent ICT solutions for companies and organizations. Our customers are a mix of Danish and european customers. Our main focus areas are Project Management using prototyping, Design and OO programming, Webportals, CMS and Mobile applications.

As a company we are strongly focused on methods like project management and specifications using the OO methods. We have our own designer and can provide highly focused designs for portals and mobile solutions. We provide Webportals and CMS solutions using both open source CMS software Mambo and Joomla and .NET platform using dotnetnuke software. We provide mobile solutions using .NET and smart devices like smartphones and PDA's. Our focus on mobile solutions have provided solutions for different companies in the tourism industry heavily using a mix of .NET C#, multimedia, GPS, RFID, Database, XML and Flash.

For the moment being we are designing and developing a new IT application that can handle food traceability documentation supporting Supply Chain Management.
