PROJECT

ACRONYM : **AQUAWEL**

Project Type : Integrated Project Network of Excellence STREP Other : **CA**

Status Planned for submission Running EU project

Refers to call SSP 4th call

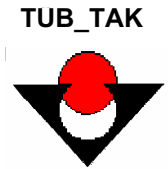

Main research area	Sustainable agriculture production systems: development of a basis for policies to promote sustainable, quality-based agriculture production systems, including non-food agriculture, and their interactions	
Topic	Fish Welfare	
Title of the project	Increase of Fish Welfare in Aquaculture	
Project description	Ensuring fish welfare and good husbandry practices with reduced stress conditions is not only of ethical relevance, but could also reduce the risk for disease outbreak and improve product quality. For this, we target to determine the present conditions and improve fish welfare and also to widespread to other fish farms.	
	The aim of this project is to bring together relevant industry, public authorities, research community, regulators, fish breeders, civil society to explore the possibility of launching a technology platform to develop tools to exploit biotechnologies to support and develop sustainable fish breeding that is sustainable and takes fish welfare into account. It will also aim to establish a vision paper and define a strategic research agenda.	
Keywords	Aquaculture, fish, welfare, fish farming systems, developing the breeding, fisheries rural economies	
Partners involved	15	
Project budget	1-2 M€	Reserved for SMEs 13.2 M€

SMEsforFOOD is a 3-years project co-funded by the European Commission (DG Research) aiming at promoting & increasing SMEs participation in large European research projects in the fields of Quality and Safety
