

STREP Project Partner Search

Title of the project

Oral Administration of active principles with therapeutical effect

Thematic line addressed

LSH-2005-1.2.1.2 : New tools to investigate ADME properties of drugs involving a carrier system

Summary of the project

Though the oral administration represents the most physiological and comfortable route to give drugs, many active principles fail to pass through the digestive tract where they are denatured or degraded. In addition, their absorption might be limited, not to say prohibited, by the intestinal barrier.

Therefore, we have conceived vectors to protect the active principle against the aggressive environment of the stomach and to facilitate its absorption at the intestinal level.

Please suggest keywords to describe the research area of your proposal.

Encapsulation	Biopolymers	Diabetes	Vectors	Drugs	Therapy

Partners Expertise Sought

Partner skills and competencies needed (SME, Industry, research centre, university, etc.):

SMEs:

- Encapsulation
- Biopolymers
- Polymers synthesis
- Transgenic animals

Target Partner country:

All EU countries but France and UK

Please provide a contact list of partners already acquired:

Name	Country	Type	Business
ICS	FR	CNRS	Polymers/Biopolymers
CeeD	FR	Res Inst	Diabetology/Endocrinology
Université Libre de Bruxelles	BE	University	Experimental hormonology
Universita di Pisa	IT	University	Diabetology
CTTM	FR	Res Centre	Chemistry - polymers
JMUW	DE	Univeristy	Microsurgery
UCL	BE	University	Analyses of surfaces and interfaces

Contact searching for new partners:

Surname: Alain		
First name: BELCOURT	Title: Dr.	
Position in organization: Scientific Vice-Chaiman and Director of Research		
Organisation name: CeeD		
Independent SME	YES	NO ✓
RTD lead partner	YES ✓	NO
If NO, Name and Contact Details of the lead partner:		
Department/Unit:		
Address: 1, boulevard René Leriche		
City: Strasbourg	Postal code: 67200	
Country : FRANCE
